

*CDS solves real challenges
in today's real business world*

Challenges:

Space planning to accommodate relocation to a new building, and expansion of operations for a 5 year growth pattern.

Achieve look that's hi-tech, but also easily moved and reconfigured.

Needed a dealership they could count on for quick customer service.

Solutions:

CDS flew the client, on the Allsteel corporate jet, to Allsteel corporate headquarters to review the breadth of product available to meet their needs. The innovation of products in the Allsteel line is very impressive, and the client appreciated their scope, easy installation processes, and hi-tech finishes. CDS was also participatory in all construction meetings, and took lead role in locating core drills for power and data.

Products:

Allsteel®

- Terrace 2.6 Workstations
- Get Set tables and chairs
- Sum Seating
- #19 Seating

Gunlocke®

Performance in Wood.

- Medley 2.0

"I was quite captivated by the Allsteel REACH line while at their headquarters. While we didn't use it, it well demonstrated Allsteel's commitment to innovative products. It was a very rewarding day-trip to see everything in full action." Robert Cavallero, Designer
