

*CDS solves real challenges  
in today's real business world*

**Orange TV  
Vision TV**

**Industry:**

Television Broadcasting

**Project Scope:**

Relocation of offices  
to new building  
(Combination offices  
and edit suites)  
Orlando, FL  
16 Office Suites

**Challenges:**

Design a workspace that permeates the warmth of wood, but without the uninviting feel of typical panel systems.

Most work areas must be able to support TV monitors and other electronic equipment.

Strict delivery deadlines; fixed budget.

**Solutions:**

Work surfaces utilized the flexibility, durability, and value of the HON Initiate line. Case goods and pedestals came from the HON 10500 series, promoting a quite amiable feeling with a polished look plus real-world functionality. Rather than the usual systems panels, half-height drywall was used. This, along with media storage from the 10500 series, provided for ample space for office materials and equipment. Lastly, their seating needs were best served with the comfort and ergonomic design of HON Task Seating.

**Products:**

- Initiate Worksurfaces
- 10500 Casegoods, Pedestals, Media Storage
- Task Seating

*"CDS fit just what we wanted. They weren't necessarily the least expensive, but their design suggestions were great and their response time phenomenal,"* Bill Suchy, General Manager, Orange TV
